

Protein Extraction, Purification, Digestion.

The **R230 Focused-Ultrasonicator**:
one tool for streamlined workflows.

Now you can add greater robustness and reproducibility to your protein sample prep with the R230 Focused-Ultrasonicator.

The R230 harnesses the power of Adaptive Focused Acoustics® (AFA®) technology to enable fast and reliable protein sample preparation. It works with a wide variety of sample types, including FFPE, cells, fresh frozen tissue, and others.

What's more, this integrated solution is specially designed to meet the needs of today's protein researcher. It's scalable, flexible—and exactly what you need to simplify your workflows.

Learn more about streamlining your
protein sample prep.

Simple, effective protein sample prep with the R230

On-Bench

On-Deck

Features

- Powered by Adaptive Focused Acoustics® (AFA)®
- Temperature controlled
- Automation compatible on-deck/deck adjacent with integrated RFID
- Automated water management (filling, setting, and monitoring) and pre-scheduled chilling and degas

Benefits

- Controlled, non-contact processing
- Maintains optimal sample integrity and provided high recovery
- Reduces human error
- User-defined scheduling for system set-up maximizes laboratory efficiency

It's time to improve your protein sample prep.
