

truCOLLECT[®]

Whole Blood Collection Solution

**Venipuncture
Quality**

**Simple
Self-Collection**

**Designed for
Automation**

An integrated solution that combines a whole blood self-collection device with an automation-friendly laboratory workflow. Designed for simplicity, our process delivers high-quality analytes, enabling better results for downstream molecular testing.

Effortless Collection: Volumetric blood with fingerstick sampling in seconds

Ambient Shipping: Ships at ambient temperature via standard mail; no dry ice, no sample degradation

Automated Workflow: Adaptive Focused Acoustics[®] (AFA[®]) technology delivers consistent DNA yield in a workflow designed for seamless automation integration

Process on a R230 Focused-ultrasonicator and Liquid Handler

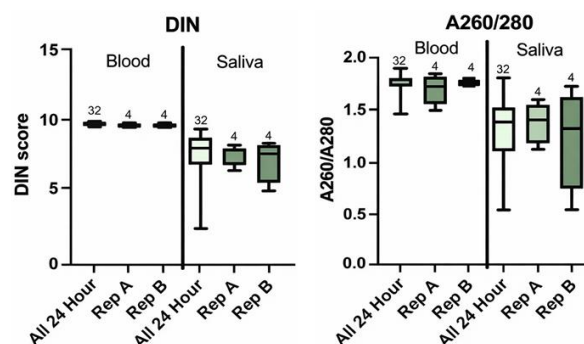

End-to-end Blood Collection Solution

Designed for self-collection, ease-of-use, and lab efficiency, our truCOLLECT Solution supports organizational profitability by streamlining workflows, ensuring sample shipping stability and delivering superior analyte quality.

More Consistent DNA Quality Starts with truCOLLECT

- truCOLLECT delivers highly reproducible results with significantly lower variability than saliva-based samples
- Compared to saliva, truCOLLECT produces significantly tighter CVs across collections and downstream analysis.
